Welcome!

This meal plan is designed to support optimal thyroid health by using nutrient-dense, thyroid-supportive foods.
Your thyroid gland plays a crucial role in your overall health, producing hormones regulating metabolism, body temperature, and energy levels. When your thyroid is not functioning optimally, it can lead to various health issues, including weight gain, fatigue, hair loss, and mood changes.

Fortunately, many foods have been shown to support thyroid health, including those rich in iodine, selenium, zinc, and other key nutrients. This meal plan includes a variety of whole foods that are rich in these nutrients, as well as anti-inflammatory foods to support overall health and well-being. Following this meal plan can nourish your thyroid gland and support optimal health and well-being. Let's get started!

Road Map to Success

01

HAVE A CALORIC SURPLUS

To gain muscle mass, you need to consume more calories than your body burns, creating a caloric surplus. This surplus provides the energy and nutrients required for muscle growth and recovery. However, it's essential to maintain a moderate surplus to prevent excess fat gain.

02

AIM FOR AN ADEQUATE PROTEIN INTAKE

Protein is the building block of muscle tissue, and consuming enough high-quality protein is crucial for muscle growth and recovery. Aim to consume at least 1 gram of protein per pound of body weight per day.

03

INCLUDE NUTRIENT-DENSE CARBOHYDRATES

Carbohydrates provide energy for workouts and replenish glycogen stores, which are essential for muscle recovery. Opt for nutrient-dense carbohydrates such as whole grains, fruits, and vegetables, which are rich in fiber, vitamins, and minerals.

04

INCLUDE HEALTHY FATS

Healthy fats are essential for hormone production and absorption of fat-soluble vitamins, which support muscle growth and overall health. Include sources of healthy fats such as avocado, nuts, seeds, and olive oil in your meals.

The Benefits
OF THIS MEAL PLAN

A muscle gain meal plan has several benefits for those looking to increase muscle mass and improve their overall health and fitness. Some of the key benefits of a muscle gain meal plan include:

SUPPORTS MUSCLE GROWTH
Consuming a balanced diet with sufficient protein, carbohydrates, and healthy fats can help support muscle growth and recovery, which is essential for increasing muscle mass and strength.

IMPROVES PHYSICAL PERFORMANCE
Eating a diet that provides adequate energy and nutrients can improve physical performance, allowing you to perform better during workouts and other physical activities.

ENHANCES RECOVERY
Consuming a balanced diet that includes nutrient-dense foods can help support muscle recovery, reducing the risk of injury and improving overall exercise performance.

SUPPORTS OVERALL HEALTH
A muscle gain meal plan that includes a variety of whole, minimally processed foods can help improve overall health, reducing the risk of chronic diseases such as heart disease, diabetes, and certain types of cancer.

BOOSTS METABOLISM
Consuming a balanced diet that provides sufficient energy can help boost metabolism, allowing your body to burn more calories and maintain a healthy weight.

IMPROVES BODY COMPOSITION
Following a muscle gain meal plan can help you achieve a better body composition, reducing body fat and increasing muscle mass, resulting in a leaner, more toned physique.

Is this Meal Plan SUITABLE FOR YOU?

To gain muscle mass, you need to be in a caloric surplus, which means consuming more calories than you burn through physical activity and metabolic processes. However, the exact number of calories you need to eat to gain muscle depends on various factors such as your age, gender, body weight, height, metabolism, and activity level.

In general, it's recommended to aim for a caloric surplus of 250-500 calories per day to gain muscle without gaining excess fat. This surplus should come from a balanced intake of macronutrients, with an emphasis on protein intake to support muscle growth and recovery.

You can use your basal metabolic rate (BMR) to estimate the number of calories you need to consume each day to maintain your current weight, then add some extra calories to make sure you'll have a caloric surplus.

CALCULATE YOUR BMR

BMR stands for Basal Metabolic Rate, which is the amount of energy (in calories) that your body needs to maintain essential functions while at rest. Calculating your BMR can help you determine how many calories your body needs to function correctly.

There are several formulas to calculate BMR, but one of the most commonly used formulas is the Harris-Benedict equation. The formula differs for men and women, considering factors such as height, weight, age, and sex.

For men: BMR = 88.362 + (13.397 x weight in kg) + (4.799 x height in cm) - (5.677 x age in years)
For women: BMR = 447.593 + (9.247 x weight in kg) + (3.098 x height in cm) - (4.330 x age in years)

To use the formula, you'll need to know your weight in kilograms, height in centimeters, and age in years. Once you've calculated your BMR, you can use it to determine how many calories you must consume daily to maintain, gain, or lose weight. Note that this formula provides an estimate, and individual variations may occur.

How to

ADJUST THE MEAL PLAN

If you're looking to gain muscle mass, you may need to increase your calorie intake to support your workouts and promote muscle growth. One way to do this is to adjust your current meal plan.

Here are two suggestions to adjust your meal plan for muscle gain:

ADD MORE MEALS
You can increase your daily calorie intake by adding an extra meal to your current meal plan. This meal should be well-balanced and contain protein, healthy fats, and complex carbohydrates. A good option could be a protein shake or a meal that includes grilled chicken breast, quinoa or rice, and mixed vegetables. This will increase your daily calorie intake to approximately 2500 calories.

For an easier option, choose one already exciting meal that is included in the meal plan that is already set to approx 550 calories.

INCREASE FOOD PORTIONS
You can also adjust your current meal plan by increasing the portion sizes of your meals. A simple way to do this is to add approximately 20% more food to each meal. This could be an extra scoop of rice or an additional serving of vegetables. This will increase your daily calorie intake to approximately 2400-2500 calories.

If you need even more calories, you can add two extra meals or increase the portion sizes even further. For example, adding two extra meals to your current meal plan would increase your daily calorie intake to approximately 3000 calories.

Remember to also make sure that you're getting enough protein to support muscle growth. Aim for approximately 1 gram of protein per pound of body weight per day. Additionally, make sure to stay hydrated by drinking plenty of water throughout the day.

Shopping GUIDE

A grocery store is the main source of all the foods that end up on your dinner table, so it's critical to shop there wisely if you want to eat as healthily as possible. Don't worry—it's easier than you think!

PRIORITIZE LEAN PROTEIN
Look for lean sources of protein such as chicken, turkey, fish, lean beef, eggs, tofu, and low-fat dairy products. These foods are rich in essential amino acids that support muscle growth and repair.

CHOOSE COMPLEX CARBOHYDRATES
Opt for complex carbohydrates such as brown rice, quinoa, sweet potatoes, and whole-grain bread instead of refined carbohydrates like white bread, pasta, and sugary snacks. Complex carbohydrates provide sustained energy for workouts and help replenish glycogen stores in muscles after exercise.

STOCK UP ON VEGETABLES AND FRUITS
Vegetables and fruits are nutrient-dense foods that are rich in vitamins, minerals, and fiber. Aim to include a variety of colorful fruits and vegetables in your diet to ensure you're getting a wide range of nutrients.

Fresh vs Frozen

Both offer unique benefits when it comes to fresh vs. frozen. Fresh produce is often more flavorful, as it has not been processed and frozen, and can also provide more nutrients. Frozen produce is convenient, as it is often already pre-cut and ready to be cooked, and it can also last much longer. Ultimately, it depends on your personal preference and needs, but both fresh and frozen can be great options for healthy eating!

DON'T FORGET HEALTHY FATS
Include sources of healthy fats such as nuts, seeds, avocado, and fatty fish like salmon. Healthy fats are important for hormone production, energy production, and overall health.

READ FOOD LABELS

When shopping for packaged foods, read the nutrition labels carefully. Look for foods that are low in saturated and trans fats, added sugars, and sodium. Aim to choose foods that are high in protein, fiber, vitamins, and minerals.

BUY IN BULK

Buying in bulk can be a cost-effective way to stock up on healthy foods such as whole grains, nuts, and seeds. Just be sure to store them properly to maintain freshness.

BUY IN-SEASON PRODUCTS

In-season produce is often fresher, tastier, and more affordable. Check out your local farmer's market for the freshest and most nutrient-dense produce.

TIPS FOR A *smarter* GROCERY LIST

- **Go to the grocery store purposefully**, stick to your list, save money, and decrease food waste.
- **Categorize your grocery list**: Make sure your list has foods categorized by area of the grocery store, so you don't miss items.
- **Plan ahead!** Use your meal planner, so you know what to buy for the week.

LOOK FOR SALES

Buying healthy foods can be expensive, so look for sales and discounts on lean proteins, whole grains, and other healthy foods.

SHOP IN PERIMETER

In most grocery stores, the perimeter is where you'll find fresh produce, lean proteins, and dairy products. This can help you avoid the temptation of processed and packaged foods in the center aisles.

Remember, it's not just about what you eat but also how you fuel your body. Every meal is an opportunity to nourish your muscles and take one step closer to your goals. Stay consistent, stay focused, and trust the process.

Believe in yourself, and never give up!

3 Dietician Tips
TO EXPERTLY MEAL PLAN

1. DESIGNATE A "PLANNING TIME"
Consistency is key in forming any habit. Meal planning involves giving yourself time to plan! Start slowly by setting aside 20 to 30 minutes on a Sunday (or whatever day works for your schedule) to think about the week ahead. Look at your schedule and brainstorm foods you would like to eat and the amount of time you have in the week to cook.

Reviewing your schedule allows you to work around time commitments such as kids' activities, work schedule, and social events. When using a meal planning template and noting your weekly schedule, it becomes easier to plan and harder to make excuses! You decide in advance if you want to plan a re-heated meal or maybe cook a quick 15-minute meal.

2. TAKE A FOOD INVENTORY = MEAL IDEAS
Taking stock of perishable food items on-hand is crucial in making a realistic and sustainable meal plan. The purpose of taking a grocery inventory is to use existing groceries first, so you only buy what you need. For example - if you have spinach, cherry tomatoes, mushrooms, and eggs in your fridge, plan a meal in your week to use these ingredients, like a spinach quiche or stir-fry with veggies and scrambled eggs.

3. PROGRESS, NOT PERFECTION
For beginners, meal planning is more important than the skill level in your meals. Creating a plan saves time, decreases eating out, increases healthy eating, and saves money. Making a straightforward meal plan and trying your best to follow through with it is more important than striving for advanced culinary creations, which may be unrealistic with busy weeknight schedules. Keep it simple!

Supplements TO CONSIDER

WHEY PROTEIN POWDER
Whey protein is a fast-digesting, high-quality protein that can help support muscle growth and recovery. It's an easy and convenient way to increase your protein intake, especially for those who struggle to consume enough protein through whole foods.

CREATINE
Creatine is a naturally occurring compound that helps provide energy to muscles during high-intensity exercise. Supplementing with creatine can help increase muscle mass, strength, and exercise performance.

BRANCHED-CHAIN AMINO ACIDS (BCAAS)
BCAAs are essential amino acids that can help support muscle growth and recovery. They're particularly beneficial during and after exercise, as they help reduce muscle breakdown and promote muscle protein synthesis.

BETA-ALANINE
Beta-alanine is an amino acid that can help increase muscle endurance and delay fatigue during high-intensity exercise. It works by increasing the production of carnosine, which helps buffer lactic acid in the muscles.

Remember, supplements should not be a replacement for a healthy, balanced diet. It's always best to consult with a healthcare professional or registered dietitian before starting any supplement regimen.

PROTEIN PANCAKES

Ingredients

- ½ cup (45g) of old-fashioned oats
- 1 scoop vanilla protein powder (30-35g per scoop)
- ½ teaspoon baking powder
- 1/8 teaspoon salt
- 1 large egg
- ½ cup (120ml) unsweetened almond milk
- ¼ teaspoon vanilla extract
- Cooking spray or butter for the pan

Instructions

1. In a blender or food processor, grind the oats into a fine powder.
2. Add the protein powder, baking powder, and salt to the blender and pulse a few times to combine.
3. In a separate bowl, whisk together the egg, almond milk, and vanilla extract.
4. Add the dry ingredients to the wet ingredients and stir until well combined.
5. Heat a non-stick pan over medium heat and coat with cooking spray or butter.
6. Pour 1/4 cup of batter onto the pan for each pancake.
7. Cook until the edges start to look set and the bottom is golden brown, then flip and cook for another 1-2 minutes until fully cooked.

AVOCADO EGG TOAST

Ingredients

- ½ medium avocado
- 1 tablespoon extra-virgin olive oil
- ½ teaspoon garlic powder
- Pinch of salt
- 2 sliced hard-boiled eggs
- 2 slices whole-wheat toast
- 1 teaspoon freshly chopped parsley (optional)

Instructions

1. Toast the slices of bread until golden brown.
2. In a small bowl, mash the sliced avocado with a fork. Season with garlic powder, salt, and pepper to taste.
3. Spread the mashed avocado evenly onto the toasted bread.
4. Arrange the sliced boiled eggs on top of the mashed avocado.
5. Drizzle olive oil over the eggs and sprinkle chopped parsley on top, if using.

Preparation Time: 5 min

Total Time: 10 min

Servings: 1

Note

- You can use any type of whole-grain bread you prefer, but make sure to choose a bread that is high in fiber and has minimal added sugars.
- For added flavor, you can top the toast with additional seasonings or toppings, such as red pepper flakes, sliced tomatoes, or crumbled feta cheese.

BANANA OAT SMOOTHIE

Ingredients

- 1 medium banana, sliced
- ½ cup (45g) rolled oats
- 1 scoop vanilla whey protein powder
- 1 tablespoon natural peanut butter
- 1 cup (240ml) unsweetened almond milk
- ½ cup ice cubes

Preparation Time: 5 min

Total Time: 5 min

Servings: 1

Instructions

1. Combine all ingredients in a blender and blend until smooth and creamy.
2. Pour the smoothie into a glass and serve immediately.

Note

- You can use either regular or quick-cooking rolled oats for this recipe.
- To make the smoothie thicker, add more ice cubes or reduce the amount of almond milk.
- For a vegan option, you can use a plant-based protein powder instead of whey protein powder and substitute almond butter for peanut butter.

Ingredients

- 1 boneless, skinless chicken thigh (approximately 4-5 oz)
- ½ cup (95g) of brown rice
- 1 cup (240ml) of low-sodium chicken broth
- ¼ cup (40g) of diced onion
- ¼ cup (30g) of diced carrot
- ¼ cup (30g) of diced celery
- 1 clove of garlic, minced
- 1 tablespoon of olive oil
- Salt and pepper to taste

Instructions

1. Rinse the brown rice and drain.
2. In a medium pot, heat the olive oil over medium-high heat. Add the diced onion, carrot, celery, and garlic and cook for 2-3 minutes, until the vegetables are slightly softened.
3. Add the brown rice and stir to combine with the vegetables. Cook for another 2-3 minutes to toast the rice.
4. Add the chicken broth and bring it to a boil. Reduce the heat to low, cover, and simmer for 45 minutes or until the rice is tender.
5. While the rice is cooking, season the chicken thigh with salt and pepper.
6. Heat a non-stick skillet over medium-high heat. Add the chicken thigh and cook for 5-7 minutes on each side until cooked through and browned.
7. Serve the chicken thigh brown rice with some of the diced vegetables from the pot.

- Fats: 18g
- Fiber: 6g

Ingredients

- ½ cup (90g) couscous, uncooked
- ½ avocado, pitted and cubed
- ½ grapefruit, peeled and segmented
- ½ cup (140g) canned cannellini beans, drained and rinsed
- 2 oz (55g) low-fat feta cheese, crumbled
- 1 teaspoon fresh mint, chopped
- 1 teaspoon fresh cilantro, chopped

For the dressing

- 1 tablespoon lemon juice
- 1 tablespoon grapefruit juice
- 1 teaspoon olive oil
- pinch of salt & pepper

Preparation Time: 20 min

Total Time: 25 min

Servings: 2

Instructions

1. Cook couscous according to package instructions.
2. Make the dressing by placing all the dressing ingredients in a bowl and whisking until well combined. Set aside until needed.
3. Place the beans, couscous, avocados, grapefruit, feta, mint, and cilantro into a large bowl. Pour over the salad dressing and toss gently. Serve chilled or at room temperature.

Note

- Fill a glass or plastic container nearly full with water. With the flesh side down, place the avocado in the container, cover it, and place it in the fridge. This will keep the avocado from turning brown.
- Reserve 1 serving for the next day's dinner

Ingredients

- 4 oz boneless, skinless chicken breast cut into bite-sized pieces
- ¼ cup (45g) uncooked brown rice
- ½ cup (35g) sliced mushrooms
- ½ cup (60g) chopped bell pepper (any color you prefer)
- ¼ cup (15g) chopped red onion
- 1 clove garlic, minced
- 1 tablespoon olive oil
- Salt and pepper to taste
- ½ teaspoon dried oregano
- ½ teaspoon dried basil
- ½ teaspoon paprika
- 1 cup (240ml) low-sodium chicken broth

Instructions

1. In a medium pot, cook the brown rice according to the package instructions.
2. Heat the olive oil in a large skillet over medium-high heat.
3. Add the chicken pieces and cook for about 5-7 minutes, or until they are no longer pink in the middle.
4. Add the mushrooms, bell pepper, red onion, and garlic to the skillet, and continue cooking for another 5-7 minutes, occasionally stirring, until the vegetables are slightly softened.
5. Add the salt, pepper, oregano, basil, and paprika to the skillet, and stir to combine.
6. Pour in the chicken broth and bring to a simmer.
7. Add the cooked brown rice and spinach to the skillet, and stir until well combined.
8. Serve the chicken, rice, and vegetables in a bowl, and enjoy!

STEAK WITH MASHED POTATOES

Ingredients

- 2x 4 oz (220g) steak (sirloin or ribeye)
- 2 medium-sized potatoes, peeled and cubed
- 2 tablespoons unsalted butter
- ½ cup (120ml) of low-fat milk
- Salt and pepper, to taste
- 2 teaspoons olive oil
- 2 cloves garlic, minced
- 3 cups (90g) fresh spinach leaves

Preparation Time: 25 min

Total Time: 35 min

Servings: 2

Instructions

1. Preheat the oven to 400°F (200°C).
2. Bring a pot of water to a boil and add the potato cubes. Boil until the potato is soft and tender, then drain.
3. Mash the potatoes in a bowl with a potato masher or a fork.
4. Add butter and milk to the mashed potatoes and mix well. Season with salt and pepper to taste.
5. Place the steak on a baking sheet lined with parchment paper. Brush the steak with olive oil and sprinkle with salt and pepper.
6. Bake the steak in the preheated oven for 10-12 minutes or until it reaches your desired level of doneness.
7. While the steak is cooking, heat the olive oil in a pan over medium-high heat.
8. Add the minced garlic and cook for 1-2 minutes or until fragrant.
9. Add the spinach to the pan and stir until wilted, for about 1-2 minutes.
10. Serve the steak with the mashed potatoes and wilted spinach on the side.

BANANA OAT CHIA PUDDING

Ingredients

- 1 ripe banana
- ½ cup (45g) of old-fashioned rolled oats
- 1 tablespoon chia seeds
- 1 cup (240ml) unsweetened almond milk
- 1 scoop protein powder
- ½ teaspoon vanilla extract
- 1 ounce of chopped dark chocolate (at least 70% cocoa)

Preparation Time: 10 min

Total Time: 4 hr, 10 min

Servings: 1

Instructions

1. Mash the banana in a mixing bowl until smooth.
2. Add the rolled oats, chia seeds, protein powder, almond milk, honey or maple syrup, and vanilla extract to the bowl and stir to combine.
3. Pour the mixture into a glass jar or container and cover tightly.
4. Refrigerate for at least 4 hours or overnight to allow the chia seeds to absorb the liquid and thicken the pudding.
5. When ready to serve, stir in the chopped dark chocolate and enjoy!

BANANA PEANUT BUTTER TOAST

Ingredients

- 2 slices of whole-grain bread
- 2 tablespoons of natural peanut butter
- 1 medium banana, sliced
- 1 tablespoon chia seeds

Instructions

1. Toast the bread to your desired level of crispiness.
2. Spread one tablespoon of peanut butter on each slice of toast.
3. Top each slice with half of the sliced banana.
4. Sprinkle chia seeds over the top of the banana.
5. Serve and enjoy!

Preparation Time: 5 min

Total Time: 5 min

Servings: 1

Note

- Choose a whole-grain bread that is high in fiber and protein and has minimal added sugars. This will help keep you full and satisfied.
- Use natural peanut butter without added sugars or oils. This will keep the added sugars and unhealthy fats to a minimum.

SALMON COUSCOUS SALAD

Ingredients

- 2 x 6oz (170g) salmon fillets
- 1 tablespoon olive oil
- dash of salt & pepper
- 1 teaspoon ground cumin
- 1 teaspoon ground turmeric
- 2 limes, 1 halved & 1 zested & juiced
- 1 cup (170g) couscous
- 2 tablespoons water
- 1 cucumber, diced
- 2 tablespoons parsley, chopped
- 1 tablespoon mint leaves, chopped
- 1 cup (20g) arugula
- 2 green onions, sliced

Instructions

1. Heat the oven to 400°F (200°C). Line a baking sheet with baking paper. Place the salmon fillets skin-side-down on the baking sheet. Drizzle with olive oil, season with salt, pepper, ½ teaspoon of cumin, and ½ teaspoon of turmeric. Place the halved lime, cut side up, next to the salmon.
2. Place the baking sheet and roast the salmon for 18-20 minutes until cooked.
3. In the meantime, cook the couscous according to the instructions on the packaging.
4. Prepare the dressing by combining the water, lime zest, and juice, and whisk until smooth. Add the remaining ½ teaspoon of cumin, the cucumber, and most of the parsley and mint. Mix well.
5. Add the cooked couscous and arugula to the dressing and toss to combine. Remove the skin from the cooked salmon and flake it with a fork.
6. Add the salmon to the couscous, and mix gently. To serve, squeeze the roasted lime over the salad; garnish with green onions, parsley, and mint.

CHICKEN PENNE PASTA WITH MUSHROOMS

Ingredients

- 2 oz (55g) dry whole wheat penne pasta
- ½ lb (225g) boneless, skinless chicken breast cut into small pieces
- ½ cup (60g) sliced mushrooms
- 1 garlic clove, minced
- 1 tablespoon (15ml) olive oil
- ½ cup (120ml) chicken broth
- ¼ cup (60ml) unsweetened almond milk
- Salt and pepper to taste
- 2 tablespoons (10g) grated Parmesan cheese

Instructions

1. Cook the penne pasta according to the package instructions. Drain and set aside.
2. In a skillet, heat the olive oil over medium-high heat. Add the chicken and cook for 5-7 minutes.
3. Add mushrooms and garlic, and cook for an additional 2-3 minutes until the mushrooms are tender.
4. In a small bowl, whisk the chicken broth and almond milk. Add the mixture to the skillet and bring to a simmer.
5. Let the sauce simmer for about 5 minutes.
6. Add the cooked penne pasta to the skillet, along with the grated Parmesan cheese. Toss everything together until the pasta is coated in the sauce.
7. Divide the pasta between two meal prep containers or plates.

What else to focus on
FOR MUSCLE GAIN

RESISTANCE TRAINING
In order to build muscle, you need to stimulate your muscles through resistance training. This can be done with weights, bodyweight exercises, or resistance bands. Aim to work each muscle group at least twice per week.

PROGRESSIVE OVEROLOAD
To continue building muscle, you need to challenge your muscles continually. This can be done by gradually increasing the weight, reps, or sets of your exercises over time.

REST AND RECOVERY
Your muscles grow and repair during periods of rest, so it's important to give them time to recover between workouts. Aim to get at least 7-8 hours of sleep per night and take rest days as needed.

CONSISTENCY
Building muscle is a gradual process that requires consistent effort over time. It's not something that happens overnight, and it takes dedication and discipline to see results. Consistency is key when it comes to building muscle, as you need to provide your body with a consistent stimulus to promote muscle growth.

One way to ensure consistency is to stick to a regular workout routine. This can involve working out at the same time each day or on specific days of the week. By establishing a routine, you can make exercise a habit and ensure that you're consistently working towards your muscle-building goals.

FAQ

1. HOW MUCH PROTEIN SHOULD I BE CONSUMING EACH DAY TO BUILD MUSCLE?
Aim to consume 1-1.5 grams of protein per pound of body weight each day to support muscle growth. For example, if you weigh 150 pounds, you should aim to consume 150-225 grams of protein per day.

2. SHOULD I BE CONSUMING MORE CALORIES TO GAIN MUSCLE?
Yes, in order to gain muscle, you need to be in a calorie surplus, which means consuming more calories than you burn. Aim to consume 250-500 calories more than your maintenance level each day to support muscle growth.

3. HOW MUCH WATER SHOULD I DRINK?
As per USDA guidelines, you should drink around 3 liters of water as a woman (FYI, this is 4 liters for men) daily. You can have some low or no-calorie beverages, but that shouldn't be most of your fluid intake. Coffee and tea are also allowed.

4. HOW OFTEN SHOULD I BE EATING TO SUPPORT MUSCLE GROWTH?
Aim to eat 3-4 meals per day, spaced out every 3-4 hours. This will ensure a steady supply of nutrients to your muscles throughout the day.

5. SHOULD I BE TAKING SUPPLEMENTS TO SUPPORT MUSCLE GROWTH?
While supplements can be helpful, they should not be relied on as the sole source of nutrition. Focus on consuming a balanced diet with a variety of nutrient-dense foods, and consider supplements such as protein powder, creatine, or BCAAs to support your muscle-building goals.
Remember, building muscle takes time and consistent effort. Stick to your meal plan and workout routine, and be patient and persistent in your pursuit of muscle gain.
