Semaglutide Dosing Schedule

Enchanted
MEDICAL AESTHETICS

Medication	Concentration	Vial
Semaglutide	2.5 mg per mL	One 2 mL vial (5 mg)

On a U-100 insulin syringe, **100 units = 1 mL = 2.5 mg** of this vial.

Your weekly schedule

Week	Units	Dose	Done
Week 1	10 units	0.25 mg	
Week 2	10 units	0.25 mg	
Week 3	10 units	0.25 mg	
Week 4	10 units	0.25 mg	
Week 5	20 units	0.5 mg	
Week 6	20 units	0.5 mg	
Week 7	20 units	0.5 mg	
Week 8	20 units	0.5 mg	Follow-up visit and refill
Week 9	40 units	1 mg	
Week 10	40 units	1 mg	
Week 11	40 units	1 mg	

Week 12	40 units	1 mg	

From Week 13 on, continue the dose plan from your provider.

Good to know

- Store the vial in the refrigerator. Do not freeze it.
- If your current dose is working well, you can stay on it. Many patients keep losing weight on a slower increase.
- After Week 8, your provider may raise your dose by 10 units at a time instead of doubling it.
- Feeling sick or noticing more side effects? Call us. Your provider may move you back to your previous dose.
- Add fiber to help prevent constipation. A stool softener or MiraLAX is fine if needed.
- Smaller, more frequent meals can help you avoid feeling shaky or lightheaded.
- Keep exercising and eating well. A daily vitamin is recommended.

See the Semaglutide patient information page for side effects, safety, and storage.

Refills: Text (706) 710-4015 with your preferred vial size in mL.

Emergency: Call 911 for any severe reaction.
